BRIDGE REPLACEMENT ON NH ROUTE 123A IN ALSTEAD
SIGNALS FOR SINGLE LANE TRAFFIC OVER WARREN BROOK

The New Hampshire Department of Transportation (NHDOT) announces work is underway on the replacement of the NH Route 123A bridge over Warren Brook in Alstead.

This project is located just beyond the intersection of NH 123 and NH 123A. The work will involve removal of the existing bridge and construction of the new bridge, one half at a time, while maintaining one lane of alternating traffic. Temporary traffic signals will control the flow of traffic through the site for the project duration, which is expected to be completed in October of 2019.

Cold River Bridges, LLC of Walpole, New Hampshire is the contractor for the $1.1 million project.
